## Companion Documents

### PM Plan 'n' Docs™

The ultimate list with all project management plan documents and project documents. Organized by Process Group and Knowledge Area, and color coded just like the PMProcess Flow™ poster.

### PM Primary Formulas™

The ultimate reference sheet with all formulas for the PMP® exam. Organized by Knowledge Area and color coded just like the PMProcess Flow™ poster.

### PM Terms Defined™

Glossary with definitions that are commonly used in the project charter or 4-block of projects.

### PM Roles Defined™

Glossary with the people in and around the project and their roles & responsibilities.

"The poster is a must-have for anyone who is studying the PMBOK or studying for the PMP. It is a wonderful resource and helped me very much in my PMP certification study. The price is very reasonable, and it really does provide all the information that is needed to follow the processes and identify the flow. This is the best study resource for the PMBOK processes that I've seen."

"The Q'vive chart is a much more complete flow chart, showing all process inputs, tools, and outputs, with flow lines that identify the documents used for inputs and outputs. This chart lets you trace the relationships between the various processes in detail. ... If you know what is on this chart, you will have a good understanding of PMBOK. For the record, I have no relationship with Q'vive, I am just very impressed with this product."
